3 Swans Ltd
DISPENSING SOLUTIONS

Taps & Caps for Dispensing from IBCs

We have several taps and fittings to help you dispense from IBCs. We also have adaptors, valves, caps and lids for IBCs which you can find out more about on our website www.3swans.co.nz.

Threaded Caps - The most common IBC outlets have an NW50 (60mm coarse thread). Our cap 500745 allows you to reduce your outlet to a 3/4" BSP fitting e.g. for a tap or other hose fitting as shown below. If your IBC outlet has a fine thread cap a 3/4" tap can be fitted by drilling out the centre and fixing the tap with a back nut.

NW50 cap with 3/4" BSP thread (code 500745)

Water Butt Tap with hose barb (code 406129). Hose pushes over outlet.

Code 700747 (combination code for 500745+406130) NW50 cap with water butt tap with hose connector fitted. This is a very popular item for lifestyle block owners and home gardeners storing water in IBCs.

Water Butt Tap with garden hose connector (code 406130).

3 Piece Caps with Nozzles

The most common cap like this is the NW50 cap with removable centre disc and gasket for use with nozzle (cap code 500746).

We also have these in 2" BSP and the Kingtainer size of 77mm BSP. They all use the same nozzle, 800260.
