## **Pumps for Jerry Cans, Drums and Watery Holes**

We have several types of Beckson Industrial pumps, suitable for different situations and containers. Beckson pumps are made in the USA. With PVC bodies and viton seals and valves these are compatible with a wide variety of acids and alkalis. Please always ask us to check compatibility if you're not sure (they are not solvent pumps).

### **Beckson Pumps for Jerry Cans & Drums**

#### **132000 CP1848S Chemical Transfer Pump**

Siphon or lift-action, we can fit the pumps to caps to suit your jerry cans or you can use the 2" BSP collar adaptor to fit the pumps to drums (the pumps come with a dip tube for 200L drums). We have adaptors to convert the most common drum threads to 2" BSP.

This is good for situations where you are filling smaller containers, e.g. 5L from a 20-200L container. For higher volume transfers use 132134.

**5L/min or 225ml/stroke**

**Low Volume Transfer**

#### **132134 236-PF-4 Wide Body Chemical Transfer Pump**

Siphon and lift-action, these are suitable for drums and come with 2" BSP collar adaptor. We can also supply this version with a 64x5 buttress thread collar adaptor, and we have a range of drum adaptors to convert the most common drum threads to 2" BSP. This pump is popular with customers who are transferring larger volumes e.g. filling large containers or draining drums quickly.

**20L/min or 800ml/stroke**

**High Volume Transfer**

### **Beckson Pumps for Water Transfer**

#### **132170 136-PF-6 Water Transfer Pump**

Manual lift-action, the body is 900mm and outlet is 1800mm so this model suitable for deep holes, and water can be drained well away from the hole. We can get extension tubes and stone strainers for these pumps too.

**1L/stroke**

**High Volume Water Transfer**

### **Beckson Pumps for Petrol/Fuel Transfer**

#### **132150 9A-V Petrol Pump**

Compatible with petrol, diesel, kerosene. Siphon and lift action.  
**4L/min or 110ml/stroke**
