DISPENSING SOLUTIONS

Plastic Taps - 3/4" and 2"

Breathers v Non-Breathers

To achieve a smooth flow of liquid from a tap, air must be allowed into the container...

If used in the 3/4" bung hole of a jerry can or drum, the top cap can be loosened to get a smooth flow through the tap. This is not a viable option for some containers as loosening the cap could result in spillage or possibly contamination. In these cases a **breather tap*** is required, which has a built-in air tube to allow a non-glug pour.

We have **breather taps** with two outlet sizes:

12mm Smoothflow: Perfect for filling narrow necked bottles e.g. spray or drink bottles, Code **258445** and **258446** with 38mm screw cap for jerry cans (a)

18mm Aeroflow: Wider outlet for faster flow for wider-necked containers, Code **251804** (b)

Smoothflow and Aeroflows are used on tap-caps which fit on the top of jerry cans rather than using the 3/4" threaded opening e.g. **700833** AFT fitted to 58mm cap or **700420** SFT fitted to 58mm cap (c).

Or, if you sometimes need a fast flow and sometimes fill narrow bottles, a nozzle restrictor will be ideal. The restrictor clips onto the outlet of an AFT or Jumbo tap, reducing the outlet from 18mm to 12mm (204676) (d).

a. 258445 deep 38mm cap or 258446 shallow 38mm cap

b. 251804 3/4" threaded tap

c. Tap-Caps AFT or SFT fitted to jerry can caps

d. 204676 Nozzle Restrictor

We have **non-breather** 3/4" taps with outlets of varying sizes, as well as 2" taps:

8mm Quick Serve: perfect for filling narrow necked bottles e.g. spray or drink bottles Code **255830** (e)

10mm: Snap Tap press on tap, codes **302033** (f) (green) and **302110** (white) (other colours available).

Water Butt Taps (outdoors, not for drinking water), codes **406129** and **406130** (g. with garden hose connector)

10mm: Polyflow **250001** (h)

15mm: Flo Rite **252050** (i)

17mm: Plastirob **250003** (j)

18mm: Jumbo Quick Serve **250655** (k)

2" Tap: Flo King code **352050** (l)
