DISPENSING SOLUTIONS

Drum Bung Tools and IBC Tools

Drum wrenches are useful for ensuring caps and bungs are tightened correctly, and help to tighten or loosen without causing hand strain. We also have tools for the all metal drum cap seals and for the top port of IBCs. Please see our information sheet on Cap Tighteners for tools for jerry can caps.

Drum Bung Tools

Code	Description	Fits Caps/Bungs	Note
800409	Drum Spanner W-169 for Rieke bungs. Lightweight aluminium alloy, sparkless for use with hazardous chemicals	Rieke drum bungs 2" and 3/4"	e.g. 800605, 800627, 800631, 800632 
800411	Drum Spanner, Tri Sure T09, steel, universal	Wide range of 2" and 3/4" bungs and cap-seals	e.g. any of the bungs in our range 
800412	Drum Spanner manganese bronze, sparkless for use with hazardous chemicals	Tri Sure & other brand steel bungs	Small end is for 3/4" bungs 

IBC Cap Tools

800408	NW50 Cap Tightener	NW50 caps	Cannot be used with tap-caps 
800415	IBC C Spanner	6" IBC Port Lid	
800416	IBC Butterfly Wrench	6" IBC Port Lid	

If you have a range of drums from different manufacturers you will probably have a few different bungs. In this case we would always recommend the 800411 universal tool as it fits 2" plastic and metal bungs as well as 3/4" and can be used to remove metal Tab Seal capseals as well.
