R-30 Pump

Innovative Valve Easily Handles Most Viscosities

Suitable for liquids, lotions, creams and gels, the R-30's lower umbrella valve permits a smooth flow without allowing drainback.

A wide suction tube at the base and increased thread engagement at the collar also enhance its versatility.

Features/Benefits:

- **Lower umbrella valve promotes easy dispensing while inhibiting drainback**
- **Large diameter suction tube allows for high viscosity products**
- **Increased thread engagement fits a wide variety of closures**
- **Body tube offers a spring design option:**

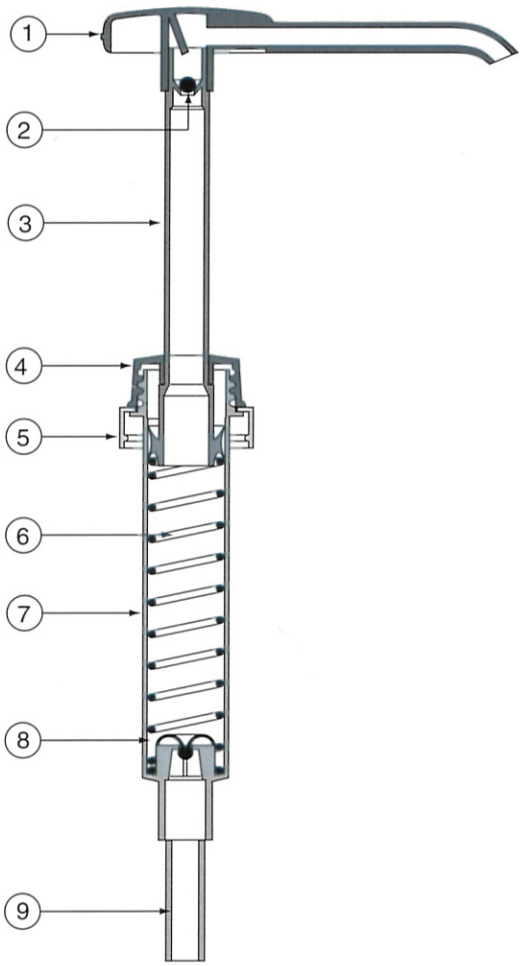
  With spring, it automatically returns pump to ready position

  Without, it allows you to shorten the pump for convenient storage
- **Round, flat head and smooth plunger action make operation easy**
- **Polypropylene construction is made to last**
- **Effectively evacuates bag-in-box packages**
- **Meets all F.D.A. requirements**
- **Color and printing capabilities build brand awareness**

Applications:

- **Foods**
- **Personal care products**
- **Pharmaceuticals**
- **Janitorial**
- **Automotive**
- **Agricultural and many other liquids, creams and gels**

Dispensers R-30 Pump



R-30 PUMP

- Available in 5, 10, 15, 20, 25 and 30ml dosage
- Requires a container opening of 38mm or larger
- Container size requirement is unlimited
