Hose End Sprayers in Stock!

We have stock of three types of hose end sprayers for bottles with 28mm or 38mm closures.

28/410 Closure

Introducing the newest sprayer in our range: 900310

These have a 28/410 closure, and an on/off lever for product and water.

You can wash down with clean water, then add product, then rinse clean, without removing the sprayer from the bottle.

How it works...

1. fill bottle

2. click to hose

3. and spray

Features

- 28/410mm thread size
- Proportion Rate: 1:25 (exact dispersal rate depends on water pressure and product viscosity)
- Fingertip on/off control
- Built-in Anti-Siphon feature prevents backflow
- Durable, chemical resistant and rustproof polymer construction
- Ideal for agriculture, garden, disinfection, pesticide control, vegetables and orchard
- Available in a wide range of colours including custom colours (MOQ applies)

PTO for 38mm Sprayers

38/410 Closure

Code 900300 and 900302 have a 38/410 closure so are perfect on jerry cans of 1-5L.

For a faster flow and/or thicker products we recommend 900302 which has a larger diameter dip tube.

With simple ergonomic design the liquid product is automatically dispersed without premixing. The units can be used over and over again, for sustainability through reusability.

Features & Specifications

- 16:1 mixture ratio (varies based on water pressure and viscosity of the liquid being drawn)
- Suitable for HD bottles
- Body and Plug can be different colours*
- Available with different dip tube lengths*
- Available with locking lugs*
- Available with a new style flow-control slide that allows the user to control the flow without turning off the tap*
